

## Data Streams and Data Windows

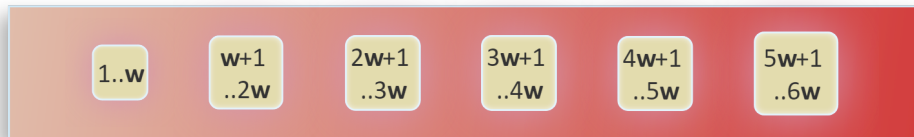

Jeffrey Sarnoff © 2023-05-02

### Sequential Data Streams

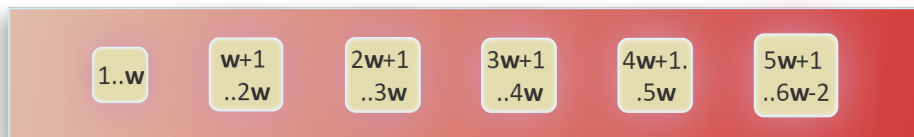

*"observations" may occur nonuniformly  
indices are presumed uniformly stepped*

### Windows Tumbling Over Data

(a) the data length is an exact multiple of the window's width

(b) the data length is 2 less than 6 times the window's width

*$w$  is the width of the  
window (its span)*
